JAYASURYA A

Software Engineer | Java | Spring Boot | Microservices | SAP Commerce Cloud

Chennai, Tamil Nadu | +91 6379889189 | jayasurya0206@gmail.com | linkedin.com/in/jayasurya009

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience developing, maintaining, and troubleshooting backend applications using Java, Spring Boot, microservices, and REST APIs. Currently working on a global B2B healthcare e-commerce platform built on SAP Commerce Cloud (CCv2), with experience in OCC APIs, Solr, FlexibleSearch, ImpEx, checkout workflows, and production issue resolution. Previous experience includes gaming-platform microservices, tourism applications, and healthcare R&D involving FHIR, Python, and Azure services.

TECHNICAL SKILLS

Programming Languages: Java, Java 17, SQL, JavaScript, TypeScript, Python

Backend Development: Spring Boot, Spring Cloud, Spring Security, Spring Data JPA, Hibernate, Microservices, REST APIs, JWT, OpenFeign, Eureka, Spring Cloud Config

Frontend Development: React, TypeScript, JavaScript, Material UI, Redux Toolkit Query

SAP Commerce: SAP Commerce Cloud (CCv2), SAP Hybris, OCC APIs, Solr, FlexibleSearch, ImpEx, SAP Customer Data Cloud (CDC)

Cloud & Databases: Microsoft Azure, Azure Blob Storage, Azure Functions, AWS EC2, AWS RDS, MySQL, MongoDB

Development Tools & Practices: Git, GitHub, Maven, Docker, Jira, Postman, Swagger, SonarQube, IntelliJ IDEA, Unit Testing, Agile/Scrum, Root-Cause Analysis

Domain Knowledge: B2B E-commerce, Healthcare Technology, FHIR

WORK EXPERIENCE

Software Engineer | Tata Consultancy Services (TCS) **June 2025 – Present | Chennai, India**

- Develop and maintain Java-based functionality for a global B2B healthcare e-commerce platform built on SAP Commerce Cloud (CCv2), supporting OCC APIs and core commerce workflows.
- Investigate and resolve complex cart, checkout, and order-processing issues, including order recovery when ERP or pricing services experience interruptions.
- Troubleshoot B2B order approval and payment-processing defects, including issues affecting saved-card validation in delegated checkout workflows.
- Resolve Solr search and indexing issues, work with FlexibleSearch and ImpEx, and support scheduled CronJobs and order recovery across regional environments.
- Perform root-cause analysis, support L2 production incidents, and contribute to platform upgrades, defect resolution, and release validation.
- Contributed to the resolution of 57+ tracked engineering issues across commerce development and platform upgrade workstreams, including checkout, order-processing, payment, and controller session-state defects.

Software Developer | Adhiran Infotech **June 2024 – June 2025 | Chennai, India**

- Developed Java 17 and Spring Boot microservices for the Oxfyn Gaming Platform, supporting player management, wallet transactions, campaigns, game operations, and payment workflows.
- Built REST APIs for player profiles, user roles, KYC, account settings, reporting, deposits, withdrawals, and transaction history.
- Implemented wallet-related business operations and integrated external game and sportsbook providers for authentication, balance inquiries, bet processing, and transaction handling.
- Used Eureka, Spring Cloud Config, OpenFeign, and Spring Data JPA to support service discovery, centralized configuration, inter-service communication, and data persistence.
- Contributed to healthcare research and development for a project delivered through HCLTech for Johnson & Johnson, working with FHIR, Python, Azure Blob Storage, and Azure Functions.

Software Engineer Trainee – Java | Techno Kryon **February 2024 – May 2024 | Chennai, India**

- Developed a payslip-generation application using Java, Spring Boot, Spring Security and MySQL to automate the creation of individual employee payslips.
- Implemented PDF generation functionality and supported application deployment on AWS EC2.

PROJECTS

Astro Tour - Japan Tourism Platform
Technologies: Java, Spring Boot, Microservices, REST APIs, SQL, AWS RDS, AWS EC2, Docker, JWT, Razorpay

- Developed backend functionality for a tourism platform supporting customizable trip plans, hotel and activity bookings, and payments.
- Implemented location and tourist-place management functionality, including state-city relationships and tourist-place retrieval APIs.
- Implemented REST APIs, business logic, JWT authentication, Razorpay integration, and SQL database interactions.
- Supported deployment using Docker and AWS services.

Level Tech - Inventory and Sales Management System
Technologies: React, TypeScript, Material UI, Redux Toolkit Query, Java 17, Spring Boot, Spring Data JPA, MySQL, Spring Security, JWT

- Developed a full-stack business management system with product catalog, customer and vendor records, purchase and sales workflows, and branch-level inventory reporting.
- Built React interfaces for catalog, purchase, and sales workflows, integrating reusable forms and tables with Spring Boot REST APIs through Redux Toolkit Query.
- Implemented JWT-based authentication and BCrypt password hashing using Spring Security.
- Developed branch-level inventory calculations based on purchase and sales quantities, supporting inventory tracking across business branches.
- Implemented JPA persistence and branch stock reporting from purchase and sales records, alongside JWT login, OTP and password recovery services, and email notifications.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Engineering **June 2020 – June 2024**
Muthayammal Engineering College | CGPA: 8.80/10

CERTIFICATIONS

- Java Full Stack Development Certification – Wipro, June 2024
- Spring Boot for Beginners – Amigoscode, June 2024
- AWS Academy Graduate – AWS Academy Cloud Foundations, October 2022
- Cloud Computing – NPTEL, May 2022
- Python 101 for Data Science – Cognitive Class, October 2021
